As simple as 1, 2, 3.

Take the fuss out of water transfer systems and experience the highest possible water savings from your rainwater tank.

The Waterboy Wizard is an innovative rainwater enclosed bypass system that is a leading water saving product in its field. The system is fully enclosed and automatically switches to mains water when the tank is empty ensuring a reliable supply of water to your toilet, washing machine and garden tap. Ideal for above ground tanks of any size the Waterboy Wizard offers simple installation and minimal maintenance making it the ideal solution for any rainwater tank.
Advantages

- Completely enclosed in neat, UV protected housing
- Automatically switches from tank supply to mains supply if there is no water in the tank or there is a power or pump failure
- No requirement for a float
- Simple installation, no hardwiring or drilling - only 3 connections

- Dry run safety mechanism
- Inline pump protective filter
- Range of earthy colours to choose from for the housing
- 45 L or 60 L option depending on the flow required
