Models

HT100-PM

The Minipak has a good operating pressure and is suitable for small homes giving ample water to operate the hot water service and other household appliances and some garden.

HJ100-PM

The Minijet has an operating pressure of 140 kPa and is suitable for medium size single story homes to operate hot water, appliances and the garden. Quiet running.

CP200-PM

The Homepak has a huge water flow and about 150 kPa constant pressure. Ideal for house, garden, hot water, etc. Pipe size must be adequate. Low electricity usage. Low noise.

HJ200/400-PM

The Jetpak series operates at 200kPa pressure and is suitable where suction lift is required. They are suitable for single and double storey homes and dual bathroom applications.
