

PondMate Pumps

Waterfall Pump

WF Series

Advantages

- Large prefilter cover results in longer operating life
- Easy to carry handle
- Vertical or horizontal positioning
- Excellent filtration capability
- Strong pump capacity
- Comes with 10 metre cable
- Suitable for salt water applications
- Each unit individually wet-tested to guarantee reliable operation

Construction

- Asynchronous water pump (DWP) built in
- Anti-corrosive and wear-resistant ceramic shaft ensures long life
- More powerful and energy-efficient magnetic rotor
- In-built thermostat and fully sealed motor for working reliability and safety

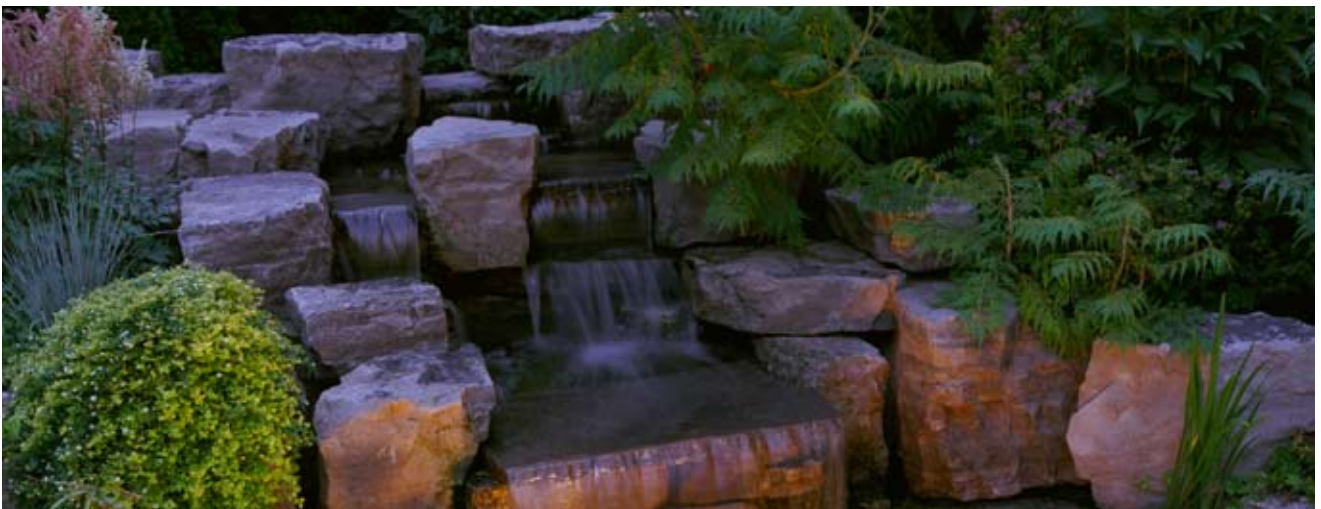

“moving water”
