

Bio-Filtration

Pressurised Pond Filters

PF Series

PF Series

New to the PondMate range, the pressurised EPF Series feature an innovative backwash system for suck-in waster auto-removal. Experience cleaner water with PondMate pond filters.

Advantages

- Easy operation
- Viewable pressure-alarm indicator for timely reminding of backwashing cleaning & maintenance
- Innovative backwash system
- Optional UV clarifier with superior shatterproof quartz sleeve for better filtration performance
- Each unit individually wet-tested to guarantee reliable operation

Construction

- Multi-layers of mechanical and biological filtration system containing 60 bio-balls and three layers of bio and filter sponge for removing harmful debris and breeding beneficial bacteria
