

Bio-Filtration

Canister Filters

EF Series

EF Series

New to the PondMate range, the EF Canister Filters are highly reliable and powerful filtering pumps. They offer good performance, lower power consumption and quiet operation.

Suitable for both fresh and marine water.

Advantages

- Powerful and adjustable flow rate
- Compact, simple installation and leak proof design
- Removable inlet/outlet combo for easy cleaning
- Inlet size is much bigger than outlet size for thorough filtration
- Mechanical, chemical and biological filtration process for maximizing water purification while reproducing beneficial nitrobacteria
- A unique button designed to eliminate manual siphoning and to provide quick start convenience
- Each unit individually wet-tested to guarantee reliable operation

Construction

- Innovative structure of UV lamp, optional for extra sterilizing
- High quality ceramic shaft
