

CR/CRI/CRN – Multi-Stage Inline Centrifugal Pump

High performance multi-stage pump ideal for irrigation and stock water

KEY FEATURES

- Wide performance range means there is a pump to suit your specific needs
- Energy efficient design resulting in reduced operating costs
- Compact design means reduced installation and servicing costs
- Optional dry run sensor provides peace of mind

CR/CRI/CRN

Energy efficient multi-stage centrifugal pumps ideal for water supply, irrigation and wash down. The pump can be direct coupled to either a single or three phase Grundfos motor. Internal components are made from stainless steel with water lubricated bearings and seals.
