

CR-PT – Water Pressure System

Single or dual multi-stage pump sets

CR-PT

The compact Grundfos CR-PT range is ideal for water supply with varying demands. Using the dual system, the demand is shared between two pumps, therefore reducing running costs.

KEY FEATURES

- All vital components constructed of stainless steel providing corrosion free operation
- Robust cast iron suction and discharge housing with anti-corrosion coating providing reliable operation
- Pump and manifold mounted on corrosion resistant stainless steel base
- Freestanding tank provides greater flexibility of installation
- A wide range of pressure tank sizes is available to suit the draw off requirements of your installation
