

APPLICATIONS

The AP35 and AP50 pumps are submersible pumps, specially designed for pumping wastewater and domestic sewage or any other non-aggressive liquid containing solid matter up to 50mm.

They can be used as a fixed or mobile installation, vertically or horizontally (discharge outlet facing up).

- Lifting domestic wastewater from washing machines, toilets etc
- Draining sumps
- Agricultural and industrial transfer of liquids

FEATURES

- Single-phase models supplied with float switch
- Motor cooling provided in all conditions by cooling jacket
- Solid handling capacity: 35mm for AP35 and 50mm for AP50
- Easy service of power cable and float
- Pumped liquid temperature up to 70°C, for limited operating period (2 minutes per 30 minute period)

CONSTRUCTION

- Stainless steel volute, pump housing and impeller
- IP68 moto
- Insulation Class F
- Semi-open vortex impeller
- Silicon carbide mechanical seal (AP35)
- Tungsten carbide mechanical seal (AP50)
- Voltage: 1 x 240V with float switch (A)

TECHNICAL FEATURES
