

# JM Jet Assisted Pumps

The JMM100 is an all-moulded pressure system complete with Minipress constant pressure controller. This economical household pressure system incorporates Onga reliability and performance. Featuring a high suction inlet to enhance self priming and a thermally protected TEFC (totally enclosed fan cooled) motor for years of quiet, reliable operation. Applications: ideal for urban garden watering, domestic household pressure system and high suction lift situations.

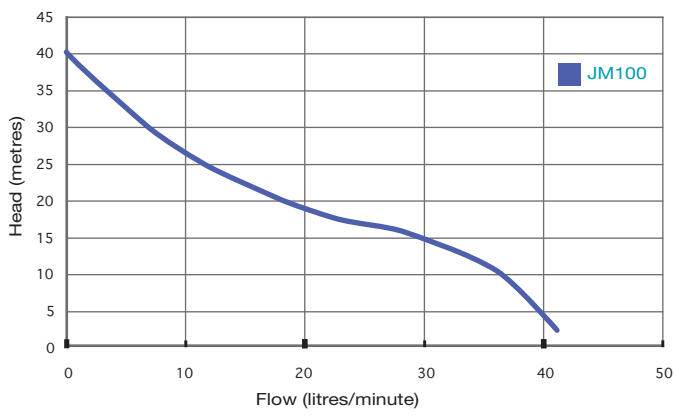

**Applications:** Ideal for automatic domestic water pressure systems, and high suction lift situations.

JM100

## JMM100 Performance

## JM Performance Table

Model	Watts P <sub>2</sub>	Pressure Switch Setting (kPa)	Suction Depth (Metres) Capacity (Litres per Min)						Port Size (BSP)	
			0	1.5	3	4.6	6.1	7.6	Suction	Discharge
JM100	300	140-275	30	27	24	21	17	12	1" F	1" F
