

The range of Leisuretime pool pumps have been purposefully designed to provide maximum performance and corrosion resistance at a realistic cost.

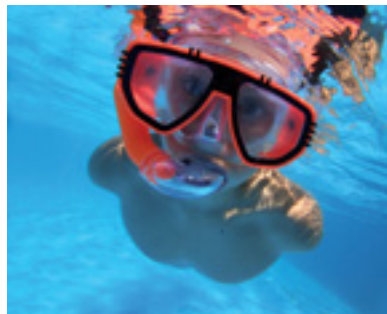

Ideal for small to medium domestic swimming pools and solar pool heating.

Leisuretime Pool Pump  
Model LTP550

## Typical Applications

- Swimming pools from 20,000 litres and up to 90,000 litres
- Solar heating circuits
- Above ground pools

Features	Benefits
<b>IP55 (TEFC) motor</b>	With IP55 protection from dust and water, your pump is preserved against the elements for many years and can be mounted outside. In addition, with a totally enclosed fan cooled motor the entry of vermin will be reduced.
<b>Electrical approvals</b>	Rest easy knowing your Leisuretime pool pump has passed all stringent Australian Standards AS/NZS 3136:2001 for safety and is approved for installation within the wetted zone of the pool area. Approvals V99108, V02301, V02302.
<b>Elevated motor foot</b>	Incorporating an elevated mount into the pump design keeps moisture well away from the motor.
<b>Double coated endshield</b>	Unique double zinc plated cast iron endshield for better corrosion protection extending the life of the pump.
<b>Large hair and lint pot with see through lid</b>	Easy to clean large hair and lint pot with a clear lid so you can check at a glance whether or not it is full.
<b>Low friction lint pot o-ring</b>	Having a low friction o-ring on the lint pot means you only need to tighten the lid by hand. No tools are necessary and because you only tighten by hand, removing the lid is also a simple task.
