

Model SP700G

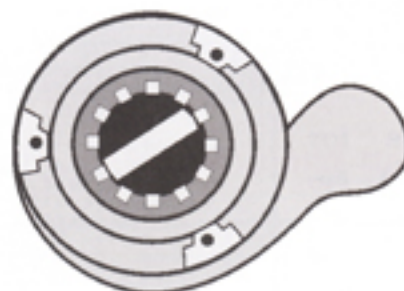

Model SPC700

Grinder Model SP700G | 100 watts

Uses a hardened grinder blade so that oversize rubbish in the incoming water is reduced in size and does not clog the pump — capable of pumping a difficult mix of water and stringy solids.

Dirty water, screened sewage, sullage, storm water or pumping effluent from abattoirs, piggeries, etc. Can be used on applications that would clog most pumps.

Pump is designed for pumping long stringy items mixed with water.

Cutter Model SPC700 | 100 watts

Uses a hardened cutter plate so that large items in the incoming water are reduced in size and do not clog the pump — capable of pumping a difficult mix of water and solids.

Dirty water, sewage with small sanitary items, sullage, storm water or pumping effluent from abattoirs, etc. Can be used on applications that would clog most pumps.

Pump is designed for pumping large items mixed with water.
