Colorbond® Colours

The Colorbond steel colours shown on this page have been reproduced to represent actual product colours as accurately as possible. However, we recommend checking your chosen colour against an actual sample of the product before selecting.

Tanks for Fire Protection

Rhino Water Tanks specialises in providing a range of water storage solutions to assist your fire protection plan. Whether it be installing a second fire outlet with coupling on a standard tank, a dedicated fire tank with a static water supply (rural or commercial), or installing one of our unique RHINO SAFEGUARD Fire Protection Tanks. The Safeguard Series has a unique 3-stage dual skin insulated protection system as well as the outlets plumbed underground to a fire resistant galvanized box and an additional sprinkler installed on the roof.

Commercial Tanks

Rhino Water Tanks also manufacture and install Flat Panel Galvanized Commercial tanks up to 2 Megalitres. These tanks use full length 1.62mm - 3.5mm galvanized flat panel sheets with a 1mm thick laminated industrial strength polyethylene liner suitable for most liquids.
